## ABOUT PUT OUT

PUT OUT is a blockchain-based arcade economic-political mini-game network based on real events, which is a play/watch-to-earn game that gives users enormous benefits and opportunities!

The game's development team is not just fulfilling the secret or manifest dream of every person in the world to find the bunker where HE sits, save the world and defeat evil, but also the opportunity to earn!

4

## VISION

Our attitude is world peace and we are against dictatorship in any form, human life is inviolable and we are keen to create political games which challenge dictatorship, authoritarian regimes, violence in any form and we will always defend justice and the unconscious attitude of people towards the value of each life.

Our challenge is to create different games and projects that include dictatorships, we value freedom of choice, freedom of religion, economic freedom and we want people to be able to manage their own freedom and their own money, we have seen the digitalization of the world economy and the decentralization of all transactions and contracts, it is faster and easier, nobody can block money and all intelligence and physical activity, and we are willing to do whatever we can to help.

5

## VISION

Anybody from the community can help us in realising our goals and objectives, take part in our projects in any form, become part of our team, part of our community that preaches freedom and democracy, take part in our projects, you can become an investor, acquire a share in our company in DAO, acquire our tokens and NFTs, we will always allocate a part of our funds for good causes - to help and support victims of the conflict in Ukraine, we will support who are in difficult life conditions through no fault of their own, people who would like to help us.

6

## VISION

We truly believe that everything in life is interconnected and that helping each other is an integral part of life, and that it is always possible to earn and help each other. By playing our games, buying NFT and participating in all the projects from our team, you will not only have the opportunity to earn, you will contribute with us not only to the digital improvement of economic processes through blockchain and smart contracts, but also one step closer to good, peace and freedom.

7

## GAME MECHANICS

The game PUT OUT has a general arcade line: the main character's goal is to gather an army, restore his energy, increase his level of readiness, while the player has the opportunity to upgrade his hero by buying, renting or selling NFT, in addition, you can collect game money and exchange it for company tokens. The main character must perform the mission within the deadline specified in a private office, such as oil production, pumping gas and that's not all!

Our team made provisions for tournaments, which will be announced in advance, which can also be prepared for, to increase the health and energy, buying or renting NFT.

The opportunity to earn there is for each user to visual integrations in a personal garage.

8

## GAME MECHANICS

If we talk about the overall game concept, PUT OUT is an arcade multiplayer minigame with the ability to participate in individual and in-game tournaments, which is based on a functional autonomous distribution of in-game tokens, which later can be exchanged into company tokens, which can be exchanged for any other tokens on the well-known exchanges.

Our team will announce the various stages (closed to investors and open to the general public) of presales of the company token, for all additional information follow on the official resources and in social networks.

9

## MARKETPLACE

The project's website operates NFT Marketplace - avatars-helmets, which have different functionality and level of pumping, such as energy level, the possibility as a percentage of getting Secret X-box, the hero's speed, random opportunities to get additional bonuses in the daily missions, etc.

On the marketplace you will be able to purchase weapons, first-aid kits, additional STRONG HEROs (generals, snipers, etc.), as well as pieces of the map from the bunker.

10

## MARKETPLACE

For the moment, we use both web2 and web3 technologies, combining their best features.

After the launch, all customers will receive a "Token" on their wallets in equal proportions with the "Tokens", as well as all items purchased by the user as NFT.

Part of the proceeds from the sale of weapons, we will send to help refugees from Ukraine.

11

## MARKETPLACE

The marketplace will include the following categories:

- Energy
- Avatarka hero
- Strong hero
- Weapons
- Secret X-BOX
- Finance
- Peace of the map to bunker

12

24

## TOCENOMICS

25

## DAO COMPANY

The main income of DAO will come from the use of NFT assets, owned by user or arms, directly or indirectly, through a rental or purchase program, when community members use assets in exchange for part of the in-game tokens directly to GARAGE.

Moreover, income in the DAO of the company will come from the integration of advertising and marketing contracts, which will be visually implemented in the network of games of our company

NFT owners will benefit from the growth of the economic value of the in-game token, as well as the main single token of the company LOGARITHM, which will be reflected in the value of its native interchangeable token in the open market

LOGARITHM TEAM will stabilize the levels of interaction with large corporations and integrate entire game blocks into advertising campaigns-type of sponsorship

The value from all sectors of activity LOGARITHM company will be displayed in the fully diluted market capitalisation of the company's main token (LOGG-token) in the public assets.

26

## DAO COMPANY

The company's business model is based on the "play/watch-to-earn" methodology and includes the following elements disclosed in the company's DAO and SUB DAO of the company's projects:

- players receive a single in-game token for in-game activities in projects of the company, which he can exchange for the main single token of the company with the possibility of further withdrawal to exchanges, where the main single token of the company - LOGG-token - will be listed
- Virtual economy with a native single in-game token, which with the help of partner and referral programs of our team will allow us to distribute rewards from the "play/watch-to-earn" technique in commission terms from the integration of advertising blocks in all projects of our company.
- Virtual economy, expressed in the acquisition/transfer or lease of NFT in all LOGARITHM PTE LTD, Singapore projects.

27
